Inspiring girls in math, science and engineering.

**Program Goals**

• Increase young women’s interest in math and science by providing fun, hands-on learning experiences.
• Provide young women with the opportunity to meet and interact with female role models currently in fields relating to science and math.
• Encourage young women to study math and science by showing them the benefits of education and its relevance to their lives.

**EYH 2007**

Cornell University’s EYH conference is an annual, one-day event in April attended by more than two hundred 7th, 8th, and 9th grade girls from across New York State. Throughout the day, the girls participate in hands-on workshops organized by students, faculty, and staff. The day concludes with a motivational speech by a prominent female scientist. A variety of scientific books, resources, demonstrations, and games are also available to participants.

Thank you for your support of this program!
